DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Gillman on 12/15/2005.

The application has been amended as follows:

Claims 27-29 are cancelled.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 11/25/2005 was filed after the mailing date of the Final Rejection on 8/24/2005. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

Priority

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 7/3/1997. It is noted, however, that applicant has not filed a certified copy of the 9-194750 application as required by 35 U.S.C. 119(b).

Allowable Subject Matter

4. Claims 1, 3-9, 12-18 and 20-26 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to independent claim 1, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "when there are plural programs in the same time zone, means for using said plural programs to check the programs of the same time zone without expanding the display area including means for displaying them overlaid one upon the other while shifting the programs rearward one at a time", as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The claim limitations directly relate to Figures 18-19, where a program guide displays plural program in the same zone on top of each other in a program cell, where once the program cell contains plural programs, the viewer can navigate through the plural programs in the program cell rearward one at a time (also see Page 60-62 of the instant application specification). The prior art of record fail to teach these limitations.
